List of Tables and Figures

Chapter 1
Introduction, Summary, and Conclusions

Table 1.1 Conclusions from previous Surgeon General’s reports on the health effects of secondhand smoke exposure 4

Table 1.2 Major conclusions of the 1986 Surgeon General’s report, The Health Consequences of Involuntary Smoking 6

Table 1.3 Selected major reports, other than those of the U.S. Surgeon General, addressing adverse effects from exposure to tobacco smoke 7

Table 1.4 Four-level hierarchy for classifying the strength of causal inferences based on available evidence 10

Figure 1.1 The determinants of exposure, dose, and biologically effective dose that underlie the development of health effects from smoking 18

Figure 1.2 Model for socioeconomic status (SES) and secondhand smoke (SHS) exposure 22

Chapter 2
Toxicology of Secondhand Smoke

Table 2.1 Levels of carcinogens in sidestream and secondhand cigarette smoke 31

Table 2.2 Inhalation studies of secondhand smoke (89% sidestream smoke and 11% mainstream smoke) in A/J mice 33

Table 2.3 Representative biomarker studies of carcinogens in persons exposed to secondhand smoke 35

Table 2.4 Relationship of specific biomarkers of carcinogen uptake to secondhand smoke exposure 40

Table 2.5 4-(Methylnitrosamino)-1-(3-pyridyl)-1-butanol (NNAL) and NNAL-glucuronide (NNAL-Gluc) in the urine of nonsmokers exposed to secondhand smoke 41

Table 2.6 Studies of experimental atherosclerosis in animals exposed to secondhand smoke 60

Figure 2.1 The correlation between levels of cotinine plus cotinine 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanol (NNAL) plus NNAL-glucuronide (NNAL-Gluc) conjugates in the urine of 74 school-age children exposed to secondhand smoke 42

Figure 2.2 Scheme showing the steps linking secondhand smoke exposure and cancer via tobacco smoke carcinogens 43

Figure 2.3 Metabolic pathways of benzo[a]pyrene (B[a]P) and 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanol (NNK) 44

Figure 2.4 Effect of active and involuntary smoking on platelet aggregation in smokers and nonsmokers 53

Figure 2.5 Flow-mediated (endothelium-dependent) and nitroglycerin-induced (endothelium-independent) vasodilation in human brachial arteries 56

Figure 2.6 Coronary flow velocity changes before and after secondhand smoke exposure 57

Figure 2.7 Secondhand smoke exposure and lipid deposits in rabbits 62

Figure 2.8 Secondhand smoke exposure and infarct size in rats 63

Chapter 3
Assessment of Exposure to Secondhand Smoke

Table 3.1 Outdoor air requirements for ventilation 90

Table 3.2 Correlations between various secondhand smoke constituents as selective markers of exposures 95

Table 3.3 Expired air carbon monoxide (CO), carboxyhemoglobin, and thiocyanate levels following exposure to secondhand smoke 102
Table 3.4  Half-life of cotinine in smokers and nonsmokers from several studies 104

Table 3.5  Analytical methods for measuring cotinine in nonsmokers 106

Table 3.6  Calculation of nicotine dosage from plasma cotinine concentrations 111

Figure 3.1  Schematic of a typical air handling unit 87

Figure 3.2  Anticipated changes in concentrations of airborne materials for various air exchange rates 88

Figure 3.3  Sensitivity of markers for secondhand smoke exposure 96

Figure 3.4  Estimates of time-varying respirable suspended particle (RSP) concentrations associated with secondhand smoke 98

Chapter 4  Prevalence of Exposure to Secondhand Smoke

Table 4.1  Trends in serum cotinine levels (nanograms per milliliter) of nonsmokers stratified by age, gender, race, and ethnicity, United States, 1988–2002 134

Table 4.2  Serum cotinine levels among nonsmokers aged 3 years and older, NHANES 1999–2002 136

Table 4.3  Concentrations of nicotine in homes of U.S. smokers 142

Table 4.4  Occupational exposures to nicotine among nonsmoking office workers stratified by the smoking policy in effect at the time of the measurements 146

Table 4.5  Occupational exposures to nicotine in nonoffice workplace settings among nonsmokers only, stratified by the smoking policy in effect at the time of the measurements 150

Table 4.6  Concentrations of nicotine in restaurants 152

Table 4.7  Concentrations of nicotine in bars, lounges, and other public venues 156

Figure 4.1  Trends in exposure of nonsmokers to secondhand smoke in the U.S. population, NHANES 1988–2002 133

Figure 4.2  Concentrations of nicotine in homes of U.S. smokers 141

Figure 4.3  Concentrations of nicotine away from work in 12 locations 144

Figure 4.4  Occupational exposures to nicotine among groups of nonsmoking office workers 148

Figure 4.5  Mean concentrations of nicotine in nonoffice workplace settings with different smoking policies 149

Figure 4.6  Average concentrations of nicotine in homes, offices, other workplaces, and restaurants where smoking is permitted 155

Chapter 5  Reproductive and Developmental Effects from Exposure to Secondhand Smoke

Table 5.1  Findings on secondhand smoke exposure and reproductive and perinatal effects 168

Table 5.2  Potentially relevant exposure periods for reproductive and perinatal outcomes 171

Table 5.3  Studies of secondhand smoke exposure and fertility 174

Table 5.4  Studies of secondhand smoke exposure and pregnancy loss 176

Table 5.5  Studies of secondhand smoke exposure and sudden infant death syndrome (SIDS) 182

Table 5.6  Studies of secondhand smoke exposure and preterm delivery 196

Table 5.7  Summary of published literature on secondhand smoke and low birth weight (LBW) 200

Table 5.8  Studies of secondhand smoke exposure and congenital malformations 206

Table 5.9  Studies of secondhand smoke exposure and cognitive development 212

Table 5.10  Studies of secondhand smoke exposure and behavioral problems among children 218

Table 5.11  Studies of secondhand smoke exposure and children’s growth 222
### Table 5.12
Case-control studies of childhood cancer by cancer type 226

### Chapter 6
**Respiratory Effects in Children from Exposure to Secondhand Smoke**
